Frequently Asked Questions – Car or Minibus Supervision

When using a car or minibus, does there have to be an adult in the vehicle, in addition to the driver, to supervise young people?

The driver of a vehicle cannot safely drive and actively supervise young people at the same time. You should assess the risks, considering age, maturity, behaviour, special needs, medical issues etc., in order to decide whether a second adult is needed.

Please see the following OEAP National Guidance documents for further advice:
